

Benefits Management Module 2 – Benefits Mapping

Working together to be at our best to make a difference.

Introduction:

NWAS deliver a significant number and variety of projects across the Trust at any one time. To ensure the investment of time, money and resources into our projects have had a positive impact on stakeholders and the organisation the Programme Management Office has developed a bespoke Benefits Management Framework for NWAS. This session will provide learners with a practical overview of the benefits mapping to successfully undertake benefits management activities within their projects.

Learning outcomes:

- Understand what a benefits logic model is and why we use it.
- Understand the definitions of each step of a benefits logic model.
- Practice developing a benefits logic model.

Who should attend?

Any staff members involved in the delivery or management of projects.

What you will need?

Openness and a willingness to learn and share experiences

A basic understanding of The benefit management Framework and associated tools available here - [Programme Management Office](#)
